

SOC 4650/5650: Setting Up a New Computer

Christopher Prener, Ph.D.

February 7th, 2017

Stata

Open the `markdoc.do` file (see Chris or Kyle if you need a copy) in Stata and execute it to install needed software.

Atom

1. Download Atom from <http://atom.io> and install it.
2. Install the language-stata package.
3. Add the course snippets to Atom's `snippets.cson` file (File ▸ Snippets)

GitHub

1. Download GitHub Desktop from <http://desktop.github.com> and install it.
2. Log into your GitHub account in GitHub Desktop. If you get errors, go to the Options menu and log in there. If you still get errors, let Chris or Kyle know.
3. Re-connect your repositories on your flash drive to GitHub using the plus icon and the Add tab. You will need to browse to the repository location for each repo and add it to GitHub Desktop. Make sure you sync each repository after adding it.

ArcGIS

In ArcMap, open the Catalog window (Window ▸ Catalog) and establish a new connection between ArcGIS and your flash drive.
